Using Your Dump Cart

To Dump: Pull latch toward your pulling vehicle. The cart will tilt back to the dump position.

To Return to Pulling Position: Push down on the front of the cart body until the latch engages and pedestal secures to the tow bar.

Your pulling vehicle’s speed should be governed by the weight of the load. The heavier the load, the slower the speed for safe operation.

Warning: Danger of Improper Use of Cart: Unit is intended for use only with riding mowers or tractors. It is NOT for highway use, being pulled at high speeds or transporting passengers of any sort. Such use could result in injuries for which we cannot be held responsible.

Maintenance Instructions:

Check tire pressure at regular intervals. Proper inflation will prolong the life of the tires.
Step 1:
Turn the hopper upside down for ease of assembly.
Bolt axle housing to the underside of the hopper, using the 3/8" round head screws.

Step 2:
Bolt the yoke brace and flat plate to the front of the cart (sandwich the flat plate between the hopper and the yoke brace, with the ‘ears’ of the flat plate facing rearward).

Step 3:
Position the tongue assembly on the axle housing and the yoke brace so that the tongue latch is facing forward and pointing downward.
Slide the axle into the axle housing and through the rear hole in the tongue member.

Step 4:
Position the tires onto the axle and place a machinery bushing over the axle and against the tire hub. Use a cotter pin to hold the wheels in position.

Step 5:
Invert your cart.
It is now ready for use.
